

Robert M. LORENCE et al  
Appl. No. 08/260,536  
November 10, 2005

**AMENDMENTS TO THE SPECIFICATION:**

Page 14, beginning at lines 14-25, please amend the paragraph as follows:

In one embodiment of the method, the agent is a cytotoxic or cytostatic agent. The cytotoxic or cytostatic agent may be a chemotherapeutic compound known in the art. Chemotherapeutic compounds contemplated by the present invention include, but are not limited to Thiotepa, Busulfan, Cyclophosphamide, Methotrexate, Cytarabine, Bleomycin, Cisplatin, Doxorubicin, Melphalan, Mercaptopurine, Vinblastine, 5-Fluorouracil, Taxol (paclitaxel), and Retinoid Acid. Typically, cytotoxic or cytostatic agents function in destroying cells and/or inhibiting their multiplication and are thus, useful in treating cancer.
